## WORK EXPERIENCE

### Bloomberg L.P.

Princeton, NJ

*Global Data Analyst (Corporate Events and Transcripts)*

September 2022 – March 2023

- Wrote python scripts that:
  - *Queried Bloomberg's Internal Data Sets*
    - Utilized Bloomberg's bqapi python library and implemented cursor mark pagination.
    - Allowed for querying and exporting of 50,000 rows of financial events and transcript data, instead of 200, to an excel spreadsheet for efficient data analysis.
  - *Aggregated Earnings Call Data*
    - Aggregated all earnings call events covered by Bloomberg from a date time interval.
    - Provided a yearly, quarterly, monthly, daily, and hourly breakdown of Bloomberg's coverage.
  - *Identified Inconsistent Fields*
    - Retrieved 9,000 US tickers using the Bloomberg Query Library API and 30 fields for each ticker.
    - Identified which tickers have differing data points across all of Bloomberg's databases which reduced client inquires about inconsistent data across different terminal functions.
- Managed client expectations and performed daily tasks to deliver our product within service-level agreement.
- Worked with vendors, engineers, and other data teams to resolve issues with user interface, client inquires, inconsistent data across different databases, and development testing.

### World Financial Group

Philadelphia, PA

*Producer*

March 2020 – July 2021

- Assisted clients with the purchase of financial assets such as life and health insurance, annuities, retirement plans, and guided clients through the underwriting process using an internal CRM system.
- Prepared an Excel organization spreadsheet to collect data and performed administrative tasks maintaining records, handling renewals, filing new claims, and making changes to existing policies.

## EDUCATION

### Drexel University

Philadelphia, PA

*Bachelor of Science in Business Administration | GPA: 3.42*

*Anticipated Graduation: June 2025*

**Major:** Finance      **Minors:** Computer Science, Mathematics

**Relevant Coursework:** Business Statistics 1-2, Business Analytics, Introduction to Finance, Intermediate Corporate Finance, Investments Securities & Markets, Computer Programming 1 - 2, Advanced Programming Tools and Techniques, Statistics and Probability I, Mergers and Acquisitions, Financial Institutions and Markets

## EVENTS & PROJECTS

### FinCo Portfolio Competition

June 2022 – August 2022

- Portfolio competition with the Drexel Finance and Investment Group creating a 60/40 portfolio in 3 months.
- Created a discounted free cash flow model to determine undervalued stocks to add to our portfolio.
- Final ROI for the portfolio is 1.41% and finished top 5 in the competition.

### Mike's Bike Business

January 2021 – February 2021

- Competition/Project where 5 teams compete in an online simulated business environment where the winning team has the highest shareholder value at the end.
- Ended with a final market share of 28.5% and shareholder value of \$66.60 winning the competition.
